

AAMVA 2016

Basic Driver Licenses and Identification Cards

WASHINGTON *NEW LOOK AND SECURITY FEATURES*

Barcode Reader Calibration Sheet

Washington State began issuing driver licenses and identification cards with barcodes in 2001. The Department of Licensing wants to help businesses and law enforcement to recognize and accept these cards. To assist you and your staff, this barcode calibration sheet may be printed on a standard desktop laser printer at 600dpi resolution or better.

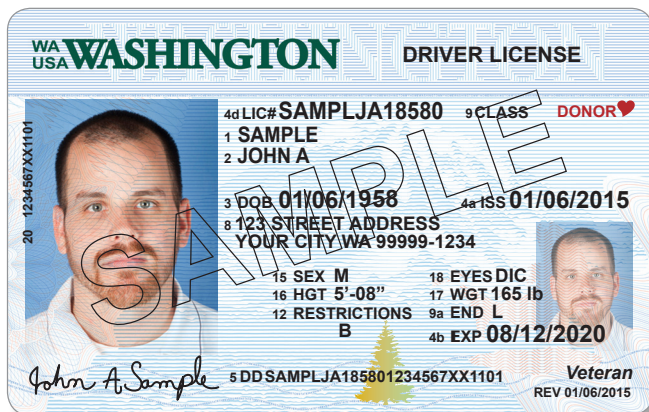

The barcode printed on this sheet should be readable by most 2D barcode (PDF 417) capable optical readers using either laser or CCD technology. The content and format is defined below.

Please inform the Department of Licensing of any concerns or problems reading the barcode.

2D Barcode (PDF417) from card back

Card Front Image of Data Fields Adult Driver License
